

TITLE
DISEASE RESISTANCE FACTORS
ABSTRACT OF THE DISCLOSURE

This invention relates to isolated nucleic acid fragments encoding corn (*Zea mays*),
5 rice (*Oryza sativa*), or wheat (*Triticum aestivum*) NPR1 homologs. The invention also
relates to the construction of a chimeric gene encoding all or a portion of the NPR1
homolog, in sense or antisense orientation, wherein expression of the chimeric gene results
in production of altered levels of the NPR1 homolog in a transformed host cell.
